THE COMPLETE FIELD GUIDE / 2026 EDITION

The Retention *Playbook.*

Every flow. Every campaign. Every SMS framework. Every design rule. Every prompt. One complete downloadable system.

8 FLOWS	9 CAMPAIGN TYPES	5-LAYER SYSTEM

A practical DTC retention operating guide. AI-agnostic. Self-contained. No second download or external vault required.

PROPEREMAILS.COM / DTC RETENTION

START HERE / ONE FILE, COMPLETE SYSTEM

The vault is now *inside the book.*

The first part explains the strategy. The next three parts contain the exact working blueprints, campaign and SMS briefs, design specifications and reusable master prompt. Nothing here requires visiting Google Drive.

READING ORDER

01	SYSTEM MAP	Retention principles, flows, campaigns, SMS and product
02	THE FLOW ENGINE	Eight automated flows with email-by-email briefs
03	CAMPAIGN + SMS	Nine email angles, four-week rotation and SMS templates
04	DESIGN + PROMPT	Brand tokens, components, output rules and master promp

YOUR PREFERRED AI, NOT ONE SPECIFIC PLATFORM

Use any AI tool that accepts clear instructions and brand context. If your tool supports projects or file uploads, attach the references. Otherwise, paste the relevant instructions into a fresh chat.

IMPORTANT

All discounts, schedules, benchmark figures, brand names and social-proof examples in the source blueprints are illustrative defaults, not verified outcomes. Validate customer data, consent, offer terms, platform capabilities and legal requirements before deployment.

00 / BEFORE YOU START

Read this before you open another tab.

Most free playbooks stop at theory. This edition contains the complete system, including every blueprint, campaign framework and reusable AI prompt, all in one PDF.

HOW TO USE THIS

Skim for the framework, then work through one section at a time. Bring your brand details, your preferred AI and your email platform.

01	The 3-engine mental model
02	The 8-flow engine
03	Campaigns: 9 types, 4-week rotation
04	The SMS layer
05	The 5-layer design system
06	The AI production engine
07	The vault: blueprints, templates and prompts

01 / THE PROBLEM

Your ad spend isn't the whole problem.

Acquisition gets the customer through the door. Retention determines what happens after the first purchase.

ACQUIRE. | **RETAIN.**

DTC brands often pour effort into ad creative and acquisition costs while customers buy once and disappear. The inbox is where a stronger relationship can start: timely welcome messages, useful education, thoughtful follow-up and sensible winback.

This playbook brings those moving parts into a single operating framework. It is designed to be adapted to your store, your customers and your actual performance data.

PRACTICAL STRUCTURE • NOT PROMISED RESULTS

02 / THE MENTAL MODEL

Three engines. One backend.

Everything else—segmentation, A/B tests and deliverability tuning—optimizes the system once the foundation is in place.

01

LIST GROWTH

Convert visitors into permission-based subscribers.

02

FLOWS

Trigger the right follow-up from real customer behavior.

03

CAMPAIGNS

Keep the relationship active with a measured editorial rhythm.

HOW THE PIECES CONNECT

Traffic → Popup capture → Welcome flow → Abandonment recovery → Post-purchase

Campaigns → Winback → Sunset

03 / THE FLOW ENGINE

Eight flows. Behavior over calendar.

An automation begins when a customer does something: signs up, browses, adds to cart, purchases—or goes quiet.

FLOW	TRIGGER	LENGTH	JOB
01 Welcome	New subscriber	6 / 7 days	**First order**
02 Site abandon	Visit, no product view	2 emails	**Re-engage**
03 Browse abandon	View, no cart	3–4 emails	**Build intent**
04 Cart abandon	Add, no checkout	4 emails	**Recover cart**
05 Checkout abandon	Checkout, no payment	4 emails	**Complete order**
06 Post-purchase	Order placed	4 / 30 days	**Grow LTV**
07 Winback	90+ days no purchase	4 emails	**Reconnect**
08 Sunset	180+ days inactive	2 emails	**List health**

THE ONE TO GET RIGHT FIRST

The welcome sequence introduces the brand, establishes trust and helps a new subscriber decide what to do next.

03 / THE FLOW ENGINE / WELCOME

The first seven days set the tone.

A new subscriber is often most interested soon after joining. Front-load useful value, then give them space.

01 **IMMEDIATE**
Deliver incentive; invite browsing.

02 **+6 HOURS**
Position brand; share founder story.

03 **+24 HOURS**
Teach one useful concept.

04 **+72 HOURS**
Offer authentic social proof.

05 **+120 HOURS**
Feature best sellers or decision shortcuts.

06 **+168 HOURS**
Close the loop with a human, helpful note.

ALL EIGHT FULL FLOW BLUEPRINTS FOLLOW IN PART 02.

04 / THE CAMPAIGN ENGINE

Three objections. Nine creative angles.

Use three lenses to understand why a customer has not purchased. They are useful working hypotheses, not a claim that every shopper behaves the same way.

P1 BRAND

"I don't trust you."

Build credibility.

01 Founder story

02 Transparency email

03 UGC showcase

P2 SELF

"This won't work for me."

Create relevance.

01 Transformation story

02 Enemy email

03 Education email

P3 VEHICLE

"The product won't fix it."

Explain the mechanism.

01 Mechanism email

02 Objection killer

03 Results email

Rotate across pillars instead of recycling the same promotional angle. Each message should answer one clear customer question.

04 / THE CAMPAIGN ENGINE / ROTATION

One rhythm. Fresh angles.

The sample cadence below places one campaign from each pillar on Monday, Wednesday and Friday, with SMS twice a month.

WEEK	MON / BRAND	WED / SELF	FRI / VEHICLE
01	Founder story	Enemy email	Mechanism email
02	UGC showcase	Transformation story SMS / THU	Results email
03	Transparency	Education email	Objection killer
04	Founder story (new)	Enemy email (new) SMS / THU	Mechanism (new)

OVERRIDE WITH DATA

The original framework uses open rate below 20% and click rate below 1.5% as diagnostic prompts. Treat them as starting heuristics—not universal industry benchmarks. Investigate deliverability, audience, creative and tracking before changing the cadence.

05 / THE SMS LAYER

SMS is not a miniature email.

A text interrupts. Earn that interruption with one purpose, one link and a genuine reason to send.

FLASH PROOF P3	One real result; direct product link.
IDENTITY HOOK P2	One sentence that creates recognition.
URGENCY DROP P3	Genuine restock or time-bound drop.
COLD TRUTH P1 / P2	One thought-provoking observation.
UGC SCREENSHOT P1	A real customer message, with permission.

THE RULES

- Maximum three lines; one emotion, one idea, one CTA.
- Never manufacture urgency or imply fake proof.
- The sample cadence sends SMS twice a month.
- Send only with appropriate consent and local compliance.

06 / THE DESIGN SYSTEM

Consistency is a trust mechanism.

Customers should recognize a brand in an instant. A design system prevents the welcome flow, campaigns and SMS from looking like unrelated senders.

01

BRAND PROFILE

Who you serve, their motivations and buying objections.

02

VISUAL TOKENS

Colors, typography, spacing, radius and borders.

03

COMPONENT LIBRARY

Reusable blocks for headers, images, CTA and footer.

04

VOICE RULES

Allowed words, banned words, cadence and tone.

05

OUTPUT SPECS

Subject/preview length, word counts and CTA logic.

Define these once, then share the files with your team or preferred AI whenever a new email needs to be produced.

06 / THE DESIGN SYSTEM / COMPONENTS

One email. One clear job.

Keep the section order stable. Change the content, not the underlying quality standard.

01 LOGO BAR

↓

02 HERO

↓

03 BRIDGE

↓

04 PRODUCT / PROOF

↓

05 ONE PRIMARY CTA

↓

06 FOOTER

LOCKED RULES

- 600px email width, mobile-first.
- No more than two font families.
- One primary CTA per email.
- Up to four products; always include a proper footer.

07 / THE AI PRODUCTION ENGINE

Your system. Your preferred AI.

The tool is not the system. The system is the brand context, locked design rules, reusable components and a precise production brief.

01

CHOOSE YOUR AI WORKSPACE

Use any capable AI tool: a project, workspace or ordinary chat.

02

PROVIDE BRAND CONTEXT

Paste the brand profile, audience, objections and voice rules.

03

ADD REFERENCE FILES

Attach tokens.md, components.md and voice.md if supported; otherwise paste relevant text.

04

SET OUTPUT REQUIREMENTS

Specify formatting, HTML/email constraints, subject lines and CTA standards.

05

RUN THE MASTER PROMPT

Set email type, flow position, customer state, objection and angle.

06

REVIEW BEFORE PUBLISHING

Check accuracy, brand voice, rendering, links and compliance by hand.

YOUR AI CAN DRAFT. YOUR TEAM STILL OWNS ACCURACY AND QUALITY.

proper *emails.*

PART 02 / COMPLETE WORKING MATERIAL

The Flow *Engine*

All eight automations: triggers, timing, subject lines, preview angles, section briefs and explicit default assumptions.

- Welcome, cart, checkout and browse abandonment
- Post-purchase, winback, sunset and site abandonment
- Ready-to-adapt email-by-email briefs; platform setup examples

How to use these blueprints: Open your preferred AI workspace or chat. Provide the Brand Profile, visual tokens, components and voice rules. Add this guide as context (or paste the relevant flow), plus product details, offers and audience. Generate a draft; then review it for brand fit, claims, links, consent and deliverability.

1 · Welcome Flow

Trigger: **New email subscriber** · Length: **6 emails / 7 days** · Goal: Convert a stranger into a first-time customer within 7 days.

Front-loaded on purpose — a new subscriber is at peak intent in the first 48 hours. Hit it hard, then space out. Klaviyo setup: Time Delay trigger between each email, Smart Sending ON, Quiet Hours set to the brand's timezone, flow exits if the subscriber orders.

EMAIL	SEND	PURPOSE
1	Immediate	Deliver discount
2	+6 hrs	Brand positioning / founder story
3	+24 hrs	Education / authority
4	+72 hrs	Social proof
5	+120 hrs	Best sellers / decision shortcut
6	+168 hrs	Last chance + support tone

Email 1 — Deliver Incentive

SUBJECT LINE OPTIONS

"Your code's inside →" · "Welcome — here's your [X%] off" · "Use this in the next 7 days" · "Inside: [X%] off + 3 to try first" · "You're in. Code attached."

PREVIEW TEXT OPTIONS

"Apply at checkout. No hoops." · "One code. Works on everything." · "We don't make you hunt for it." · "Plus the 3 picks [Brand]ers reach for first."

HERO	Headline: "Welcome to [Brand]" or "Here's your [X%] off" · Subhead acknowledging the delivery · Discount code in large type · CTA [PRIMARY-CTA] → homepage or featured collection
BRIDGE	1–2 sentences: "We don't gatekeep. Code's above — use it on whatever you want."
PRODUCT	3 bestsellers, each with [PRODUCT-CTA]
POST-PRODUCT	[BROWSE-CTA] e.g. "Shop All"

> IF MISSING
> Discount 15%. Code format [BRAND][##] e.g. CLEAN15. Products = top 3 bestsellers from Shopify. Expiration 7 days.

Email 2 — Brand Positioning / Founder Story

SUBJECT LINE OPTIONS

"Why I started [Brand]" · "I was tired of [problem]" · "The first version of this product was bad" · "We almost didn't launch this" · "Here's what nobody else is doing"

PREVIEW TEXT OPTIONS

"Short version: I built what I couldn't find" · "30 seconds — the why behind [Brand]" · "No marketing voice. Just the real reason"

HERO	Founder-voice opener · Subhead hinting at the bigger story · CTA [SOFT-CTA] → /about · No offer mention — this email earns trust, not the sale
BRIDGE	3–4 sentences: 1) moment the problem became personal 2) what didn't work 3) the turning point 4) the belief that drives the brand
PRODUCT	Optional — 1–2 products de-emphasized, or skip for a mission quote/photo
POST-PRODUCT	[SOFT-CTA] e.g. "See What We Built" + small-text discount reminder

IF MISSING

Use the brand's About page as source. Tone: confident, personal, conversational. Fall back to mission angle if no

Email 3 — Education / Authority

SUBJECT LINE OPTIONS

"Most people get [topic] wrong" · "The [ingredient/feature] nobody talks about" · "Why your [routine/method] isn't working" · "What [niche] brands don't tell you"

PREVIEW TEXT OPTIONS

"Quick read — but it'll save you money" · "Once you see this, you can't unsee it" · "60 seconds. Then you decide."

HERO	Education hook headline · Subhead tee-up · CTA [LIGHT-CTA] → product or "how it works" page
BRIDGE	3–5 sentences teaching ONE concept: state the myth → show why it's wrong with specifics → tie back to a belief shift. Depth over breadth.
PRODUCT	1–2 products that exemplify the teaching, each with [PRODUCT-CTA]
POST-PRODUCT	[BROWSE-CTA] + small-text discount reminder

IF MISSING

Pick the brand's UVP / core mechanism as the teach. Always include one specific number or comparison.

Email 4 — Social Proof

SUBJECT LINE OPTIONS

"What [Brand]ers are saying" · "37 reviews this month said the same thing" · "He almost didn't order" · "The DMs we keep getting"

PREVIEW TEXT OPTIONS

"Real names. Real photos. Real results" · "We didn't write these" · "Skip the brand talk — hear from them"

HERO	Strong quote from a customer review · Subhead: "— [Name], [time using product]" · CTA [SOFT-CTA] → reviews page
BRIDGE	1–2 sentences: "We let our customers do the talking."
PRODUCT	3 testimonial cards (not product cards): photo/initials, quote under 2 lines, star rating, product used, [PRODUCT-CTA]
POST-PRODUCT	[CONFIDENT-CTA] e.g. "Join Them" + discount reminder

IF MISSING

Pull 3 most recent 5-star reviews. Prioritize before/after detail, specific timeframes, identity shifts. Format: "Marcus T."

Email 5 — Best Sellers / Decision Shortcut

SUBJECT LINE OPTIONS

"The 3 [Brand]ers grab first" · "Start here →" · "Top 3 — picked by 1,000+ customers" · "Not sure what to try? This is it"

PREVIEW TEXT OPTIONS

"Decision made simple" · "Most-loved. Most-bought. Most-replenished" · "The shortcut to your first order"

HERO	"The 3 most-loved [Brand] picks" or "Start here" · CTA [PRIMARY-CTA]
BRIDGE	"We've got [X] products. These are the 3 that get reordered most."
PRODUCT	3 bestsellers, each with [PRODUCT-CTA] + a badge line: "Most-bought" / "1,247 reviews"
POST-PRODUCT	[BROWSE-CTA] + stronger reminder: "2 days left on your [X%] off"

IF MISSING

Use actual top 3 bestsellers by units sold. Frame as "starting kit" or "first order picks."

Email 6 — Last Chance + Support

SUBJECT LINE OPTIONS

"Your code expires tonight" · "Last call — [X%] off ends today" · "Just checking in" · "Going, going, almost gone"

PREVIEW TEXT OPTIONS

"After tonight, it's gone" · "No pressure — but it's the last reminder" · "Plus a quick question for you"

HERO	"Your code expires tonight" or "Last call" · Code shown again with explicit expiration · CTA [CONFIDENT-CTA]

PRODUCT	3 products (bestsellers + favorites), each with [PRODUCT-CTA]
POST-PRODUCT	[CONFIDENT-CTA] e.g. "Get Yours Before Midnight"

> IF MISSING
> Treat as the FINAL reminder — don't soften too much. Sign with founder name. Always offer reply-to as a support touchpoint.

---

2 · *Cart Abandon Flow*

Trigger: **Added to cart, did not checkout** · Length: **4 emails / ~3 days** · Goal: Recover the highest-intent buyers — they almost bought it.

Klaviyo: exit flow if the subscriber completes checkout. Smart Sending ON.

EMAIL	DELAY	PURPOSE
1	+1 hr	Soft reminder — no discount
2	+24 hrs	Founder voice + product reinforcement
3	+48 hrs	Objection handling (shipping, returns, FAQ)
4	+72 hrs	First discount + urgency

1 — Soft Reminder

SUBJECT

"You left this behind →" · *"Still thinking it over?"* · *"Your cart's waiting"*

BRIEF	Hero: "You left this behind" · CTA [PRIMARY-CTA] → cart URL. Bridge: "We saved your cart. Tap below to finish." Product: exact cart item(s), dynamic block. Post: [BROWSE-CTA].

> IF MISSING
> No discount. Friendly tone. Single CTA destination = cart URL.

2 — Founder Voice

SUBJECT

"Anything I can help with?" · *"Quick note from [Founder]"* · *"You still on the fence?"*

BRIEF	Text-based hero, no big image. Bridge (first-person): saw the cart → common reason people pause → open invitation to reply → signature. Small cart reminder + single [PRODUCT-CTA].

> IF MISSING
> Use founder name. Warm, not salesy. No discount.

3 — Objection Handling

SUBJECT

"The most-asked questions about [Product]" · *"Shipping, returns, and the science"* · *"Before you decide, read this"*

BRIEF	FAQ block format (not products): shipping/timing, returns/guarantee, does it actually work (link social proof), one product-specific objection. CTA [CONFIDENT-CTA].

> IF MISSING
> Standard ecom FAQs pulled from top product-specific objection in reviews.

4 — Discount + Urgency

SUBJECT

"[X%] off your cart — last call" · *"Here's [X%] off to seal the deal"* · *"Don't lose this cart"*

BRIEF	Code visible, clear expiration. Bridge: "Use code CART[XX] at checkout. Expires in 24 hours." Cart items at discounted price. CTA [CONFIDENT-CTA].

IF MISSING
Discount 10%. Expiration 24 hrs. Code CART10 or BACK10.

Trigger: **Started checkout, did not pay** · Length: **4 emails / ~2 days** · Goal: They were one click from buying — closest to money, tightest spacing.

EMAIL	DELAY	PURPOSE
1	+30 min	Immediate reminder
2	+12 hrs	Trust reinforcement
3	+24 hrs	Objection killer + FAQ
4	+48 hrs	Discount + last chance

1 — Immediate Reminder

SUBJECT

"Almost there →" · *"One step left"* · *"Your order isn't finished yet"*

BRIEF "You're one click away" · CTA [PRIMARY-CTA] → cart URL. Show cart items + estimated total.

2 — Trust Reinforcement

SUBJECT

"Quick note before you decide" · *"What happens after you order"* · *"What you're protected by"*

BRIEF 3 trust pillars: shipping timing/free over $X · returns/guarantee window · support response time. CTA [PRIMARY-CTA].

3 — Objection Killer + FAQ

SUBJECT

"Will it work for me?" · *"The 3 questions we get most"* · *"What you're probably wondering"*

BRIEF 2–3 short FAQ blocks. Cart items + 1 customer review/quote per item. CTA [CONFIDENT-CTA].

IF MISSING
Top 3 objections from reviews. Defaults: "Does it work?", "Is it safe?", "How fast?"

4 — Discount + Last Chance

SUBJECT

"[X%] off to finish your order" · *"Last attempt — here's your discount"* · *"Cart expires in 24 hours"*

BRIEF Code visible + urgency. Cart items at discounted price. CTA [CONFIDENT-CTA].

IF MISSING
Discount 10–12%. Expiration 24 hrs. Code FINISH10 or similar.

4 · Browse Abandon Flow

Trigger: **Viewed a product, no cart** · Length: **4 emails / ~5 days** · Goal: Warm interest into intent.

EMAIL	DELAY	PURPOSE
1	+4 hrs	Reminder of product viewed
2	+24 hrs	Social proof for that product
3	+72 hrs	Education / how it works
4	+120 hrs	Discount nudge (optional)

1 — Product Reminder

SUBJECT

"Still thinking about [Product]?" · *"You looked. Here it is again."* · *"Worth a second look →"*

2 — Social Proof

SUBJECT

"Here's what people say about [Product]" · *"Reviews from real customers"* · *"He almost didn't try [Product]"*

BRIEF Customer quote about the viewed product · CTA [SOFT-CTA]. 2–3 testimonial cards for that product.

3 — Education

SUBJECT

"Why [Product] works when others don't" · *"What's actually in [Product]"* · *"The science behind [Product]"*

BRIEF Mechanism chain: ingredient/feature → action → visible result. CTA [LIGHT-CTA].

4 — Discount Nudge

SUBJECT

"[X%] off to try [Product]" · *"Saved for you + a small thank-you"* · *"Here's a nudge"*

BRIEF Code visible. Viewed product at discounted price. CTA [CONFIDENT-CTA].

> IF MISSING
> Discount 10%. Expiration 48 hrs. Code TRY10 or product-specific.

---

5 · Site Abandon Flow

Trigger: **Visited, no product view, no cart** · Length: **2 emails / ~1 day** · Goal: Re-engage low-intent visitors. No discount — low intent doesn't earn premium incentives yet.

EMAIL	DELAY	PURPOSE
1	+4 hrs	Show best sellers
2	+24 hrs	Founder voice / story

1 — Best Sellers

SUBJECT

"Saw you checking us out" · *"The 3 most-loved [Brand] picks"* · *"Where most people start →"*

BRIEF "If you're curious, start here" · CTA [PRIMARY-CTA]. Top 3 bestsellers.

2 — Founder Voice

SUBJECT

"Why I built [Brand]" · *"Quick story →"* · *"Real talk about [niche]"*

BRIEF Text-heavy, conversational. 3–4 sentences on why the brand exists. Product section optional or skipped. CTA [SOFT-CTA].

> IF MISSING
> Use About page content. Warm tone, no hard sell.

---

6 · Post-Purchase Flow

Trigger: **Order placed** · Length: **4 emails / ~30 days** · Goal: Maximize LTV. Do not exit on repeat purchase.

EMAIL	DELAY	PURPOSE
1	Immediate	Thank you + expectations
2	+5 days	How to use / care guide

3	+14 days	Review / UGC request
4	+28 days	Cross-sell or replenishment

SUBJECT

"Order #[X] confirmed — what's next" · *"Thank you, [Name]"* · *"We've got your order"*

BRIEF When it ships, what to do while waiting. Order summary (dynamic). CTA [SOFT-CTA] "Track My Order".

> IF MISSING
> Standard shipping timing 3–5 days domestic.

2 — How To Use / Care Guide

SUBJECT

"How to get the most out of [Product]" · *"Quick guide to [Product]"* · *"Day 1 starts here"*

BRIEF 3–5 step usage guide, numbered or iconed. CTA [LIGHT-CTA] "See Full Guide".

3 — Review / UGC Request

SUBJECT

"How's [Product] going?" · *"2 weeks in — how is it?"* · *"Quick favor, [Name]?"*

BRIEF Why reviews matter + that you read them all. CTA [CONFIDENT-CTA] "Leave A Review".

> IF MISSING
> Link to product review page. Optional incentive if approved by brand.

4 — Cross-Sell / Replenishment

SUBJECT

"What pairs with [Product]" · *"Running low?"* · *"Complete your routine"*

BRIEF 2–3 complementary or replenishment products. CTA [PRIMARY-CTA].

> IF MISSING
> Consumables → replenishment angle. Non-consumables → cross-sell. Optional 10% returning-customer discount.

---

7 · Winback Flow

Trigger: **90+ days no purchase** · Length: **4 emails / ~14 days** · Goal: Reignite a lapsed customer.

EMAIL	DELAY	PURPOSE
1	Day 0	"We miss you"
2	+5 days	New arrivals / what's changed
3	+10 days	Special offer
4	+14 days	Last chance

1 — We Miss You

SUBJECT

"Long time no see, [Name]" · *"Where'd you go?"* · *"We've been thinking about you"*

BRIEF Warm, low-pressure. Past favorite or top 3 bestsellers. CTA [SOFT-CTA].

2 — New Arrivals

SUBJECT

"What you've missed at [Brand]" · *"New since you've been gone"* · *"Updates from [Brand]"*

BRIEF 3 newest products or updates. CTA [PRIMARY-CTA].

3 — Special Offer

SUBJECT

> IF MISSING
> Discount 15–20% (stronger than abandonment offers). Code BACK15 or MISSU15.

4 — Last Chance

SUBJECT

"Final call, [Name]" · "Your [X%] off expires tonight" · "Going once, going twice"

BRIEF — Final urgency, code visible. 3 bestsellers at discount. Soft "Either way, take care" line in footer.

---

8 · Sunset Flow

Trigger: **180+ days inactive** · Length: **2 emails / ~7 days** · Goal: Protect sender reputation. One last chance, then suppress.

Inactive subscribers hurt deliverability — Klaviyo, Gmail, and Apple Mail all track engagement. A clean list keeps your engaged subscribers landing in the inbox, not spam.

EMAIL	DELAY	PURPOSE
1	Day 0	"Still want to hear from us?"
2	+7 days	Final goodbye + comeback option

1 — Still Want To Hear From Us?

SUBJECT

"Still want to hear from us?" · "This is your last email from us" · "We're about to let you go"

BRIEF — Honest framing: "We haven't seen you open our emails in a while." CTA [PRIMARY-CTA] "Keep Me Subscribed" — flags them to stay on list.

2 — Final Goodbye + Comeback Option

SUBJECT

"This is goodbye — for now" · "Off the list, but the door's open" · "[X%] off if you ever come back"

BRIEF — Graceful goodbye + comeback offer. CTA [SOFT-CTA] → re-subscribe flow with discount. Clear "you've been removed" messaging.

> IF MISSING
> Comeback discount 20%. Code COMEBACK20. Re-subscribe link triggers a separate re-engaged flow.

> **UNIVERSAL RULE — ALL 8 FLOWS**
> When context is missing: pull product info from Shopify, pull social proof from reviews, default to the brand's Design System voice, use swappable placeholders, and list "Assumptions Made" at the end of every generation.

proper *emails.*

PART 03 / COMPLETE WORKING MATERIAL

Campaigns + *SMS*

All nine creative campaign formats, the four-week rotation, KPI response logic and practical SMS templates.

- Three objection pillars: Brand, Self and Vehicle
- Full briefs and subject angles for nine campaigns
- Four-week calendar, SMS types and performance overrides

The Philosophy

Every non-purchase has one root cause. People don't buy for exactly 3 reasons. The entire campaign program solves for all three, systematically, without repetition.

PILLAR	ROOT OBJECTION	WHAT THE EMAIL MUST DO
P1 — Brand	"I don't trust you"	Build credibility. Show proof of who you are — founder, process, mission.
P2 — Self	"This won't work for me"	Remove identity barriers. Make them feel seen and understood.
P3 — Vehicle	"The product won't fix it"	Prove the mechanism. Show results. Kill specific objections.

The rotation ensures every week covers a different pillar, and every email type within a pillar cycles through before repeating.

Pillar 1 — Brand Belief

1 · Founder Story — P1 · Brand

Objection: "I don't trust you" **Goal:** The brand isn't a company — it's a person who had a problem and built the answer.

HOW TO WRITE IT

1. Open with the exact moment the problem became personal. Specific scene, not vague backstory.
2. Show what you tried that didn't work. This validates the reader's own failed attempts.
3. Reveal the turning point — what changed in your thinking or approach.
4. Land on the belief: what you built and why it's different at a values level.
5. CTA is soft — "see what we built," not "buy now." This email earns trust, not the sale.

HOOK / SUBJECT ANGLES

"I used to spend $80/month on products that made my skin worse" · "The [niche] industry told me I had 3 options. All 3 failed." · "I built this because I got tired of guessing" · "Here's what I learned after trying everything on the shelf"

PREVIEW TEXT ANGLES

"Short version: I built what I couldn't find" · "30 seconds — the why behind [Brand]" · "No marketing voice. Just the real story"

SECTION BRIEF Hero: founder-voice headline / subhead hinting at story / CTA [SOFT-CTA] "Read The Full Story." Bridge: 4 sentences — moment → failures → turning point → belief. Product: optional, 1–2 de-emphasized or a mission quote. Post-Product: [SOFT-CTA] "See What We Built."

> IF MISSING
> Pull from the brand's About page. Tone: confident, personal, conversational. No discount mention.

2 · Transparency Email — P1 · Brand

Objection: "I don't trust you" **Goal:** Trust is built when brands show what others hide.

HOW TO WRITE IT

1. Pick ONE specific thing to be transparent about — one ingredient, one process, one decision.
2. Explain the WHY behind the decision, not just the what.
3. Acknowledge the tradeoffs — cost, limitation, complexity.
4. End with the belief: "We chose this because we believe..."
5. CTA links to the product or ingredient page.

HOOK / SUBJECT ANGLES

"Most brands won't tell you this about their formula" · "Here's exactly what's in [Product] — and why" · "We could have used a cheaper ingredient. Here's why we didn't" · "The thing we refused to compromise on"

PREVIEW TEXT ANGLES

"Full breakdown inside" · "Why we chose this over the cheaper option" · "The honest version"

SECTION BRIEF Hero: headline naming the transparent item / CTA [LIGHT-CTA] "See The Breakdown." Bridge: 3–4 sentences explaining the decision. Product: relevant product or ingredient/process breakdown block. Post-Product: [LIGHT-CTA] "Read The Full

IF MISSING
Pull from the brand's about/ingredients page. ONE topic per email — never multiple.

3 · UGC / Social Proof Dump — P1 · Brand

Objection: "I don't trust you" **Goal:** Real people, real things. Raw, unpolished. The authenticity IS the message.

HOW TO WRITE IT

1. Lead with the strongest single piece of proof in the subject or preview.
2. Present UGC with ZERO editing — keep grammar, syntax, raw language.
3. Add light context between pieces ("A customer who'd tried 4 other products:").
4. Let the proof accumulate — one after another builds momentum.
5. CTA after the last piece: "Join them →"

HOOK / SUBJECT ANGLES

"Jake sent us this last week. Sharing with permission." · "37 people told us the same thing this month" · "We didn't write this. He did." · "The DMs we've been getting lately"

PREVIEW TEXT ANGLES

"Raw screenshots inside" · "Real names. Real reviews." · "We just hit copy and paste"

SECTION BRIEF Hero: featured quote LARGE / "— [First name + initial]" / CTA [SOFT-CTA] "Read All Reviews." Bridge: 1 sentence — "We just hit forward." Product: 3–5 raw review cards, each with name, quote, product, [PRODUCT-CTA]. Post-Product: [CONFIDENT-CTA] "Join Them."

IF MISSING
Pull 3–5 most recent 5-star reviews. First name + last initial format. Include stars + product used.

Pillar 2 — Self Belief

4 · Transformation Story — P2 · Self

Objection: "This won't work for me" **Goal:** Show someone exactly like them who thought the same — and was wrong.

HOW TO WRITE IT

1. Open in the "before" — pain + skepticism, specifically.
2. Include the moment they almost didn't try it.
3. Transformation isn't just physical — it's identity.
4. Use real numbers and timeframes. "3 weeks" beats "quickly."
5. End with a line from them. Then CTA.

HOOK / SUBJECT ANGLES

"He almost didn't order. He'd tried 4 things that didn't work." · "Marcus thought his skin would never change. He was wrong." · "6 weeks. Same routine. Different face." · "The before and after isn't what you'd expect"

PREVIEW TEXT ANGLES

"One customer's story — start to finish" · "What changed in 6 weeks" · "Real photos inside"

SECTION BRIEF Hero: customer quote or before/after framing / CTA [SOFT-CTA] "Read His Story." Bridge: 4–6 sentences — before state → what he tried → the moment he almost didn't order → the shift → identity change. Product: what he used, [PRODUCT-CTA] "Same Setup He Used." Post-Product: [CONFIDENT-CTA] "Get The Same Results."

IF MISSING
Pull the brand's most powerful customer story. If unavailable, expand on the strongest review.

5 · Enemy Email — P2 · Self

Objection: "This won't work for me" **Goal:** Give the reader someone to blame. Attack a system, habit, or industry norm — never a competitor.

HOW TO WRITE IT

1. Name the enemy clearly — a system, habit, or industry standard.
2. Show how the enemy has been failing them, with specifics.

HOOK / SUBJECT ANGLES

"The [niche] industry has a [X]-step problem" · "Why your routine is working against you" · "The real reason most [niche] products fail" · "Complexity isn't sophistication. It's a sales tactic."

PREVIEW TEXT ANGLES

"Calling out the industry" · "What they don't want you to know" · "The simpler way"

SECTION BRIEF Hero: headline naming the enemy / CTA [SOFT-CTA] "See The Alternative." Bridge: name the enemy → why it fails → your alternative belief → brief positioning. Product: optional, 1–2 that exemplify the alternative. Post-Product: [BROWSE-CTA] "See How We Do It Differently."

> IF MISSING
> Skincare: "12-step routines," harsh chemicals, overpriced clinical brands. Supplements: mega-dose marketing, synthetic fillers. Pet: low-quality fillers, vet upselling.

6 · Education Email — P2 · Self

Objection: "This won't work for me" **Goal:** Teach one true, useful thing. Authority and de-skepticism. The product is a natural conclusion.

HOW TO WRITE IT

1. Teach exactly ONE concept. Depth over breadth.
2. Open with a myth/misconception. Destroy it with specifics.
3. Use numbers, comparisons, mechanisms.
4. Tie the lesson to a belief change.
5. CTA: "See how we apply this →"

HOOK / SUBJECT ANGLES

"Most men are washing their face wrong. Here's the science." · "What your skin is actually doing at night" · "The [ingredient] nobody talks about — and why it matters" · "Why your [routine] might be making it worse"

PREVIEW TEXT ANGLES

"60-second breakdown" · "Once you see this, you can't unsee it" · "The science behind it"

SECTION BRIEF Hero: education hook (myth or curiosity) / CTA [LIGHT-CTA] "See The Science." Bridge: state the myth → show why it's wrong → reveal the mechanism → tie to belief change. Product: optional, 1 applying the principle. Post-Product: [LIGHT-CTA] "See How We Apply This."

> IF MISSING
> Pick the brand's core USP/mechanism as the teaching. Always include a specific number or comparison.

Pillar 3 — Vehicle Belief

7 · Mechanism Email — P3 · Vehicle

Objection: "The product won't fix it" **Goal:** If they don't understand HOW it works, they won't believe it WILL.

HOW TO WRITE IT

1. Pick ONE mechanism per email. Go deep.
2. Write as a chain: ingredient → biological action → visible result.
3. Use analogies to make it tangible.
4. Acknowledge why alternatives fail to produce the same mechanism.
5. End: "This is why [product] works when others don't" + CTA.

HOOK / SUBJECT ANGLES

"Here's what actually happens to your skin when you use [ingredient]" · "The reason most moisturizers sit on top — and ours doesn't" · "The 3-step chain that clears texture" · "What [ingredient] actually does at a cellular level"

PREVIEW TEXT ANGLES

"The chain explained in 60 seconds" · "Most products skip step 2" · "Mechanism, not marketing"

SECTION BRIEF Hero: headline naming the mechanism / CTA [LIGHT-CTA] "See How It Works." Bridge:

4–6 sentences mapping the chain. Product: relevant product with [PRODUCT-CTA]. Post-Product: [CONFIDENT-CTA] "Try It For Yourself."

8 · Objection Killer — P3 · Vehicle

Objection: "The product won't fix it" **Goal:** Take ONE objection. Dismantle it completely.

HOW TO WRITE IT

1. State the objection directly: "We know what you're thinking: [objection]."
2. Acknowledge why it makes sense. Validate, then reframe.
3. Destroy it with specifics: data, stories, guarantees, comparisons.
4. Anticipate the follow-up objection. Answer it too.
5. End with certainty + CTA.

HOOK / SUBJECT ANGLES

"You think it's too expensive. Let's run the numbers." · "For sensitive skin: here's what's in it and why each is safe" · "'I've tried everything.' We hear this a lot." · "You don't want to add more steps. Neither did we."

PREVIEW TEXT ANGLES

"Objection meets evidence" · "The honest answer" · "Math + proof inside"

SECTION BRIEF Hero: state the objection / subhead "Let's actually address this" / CTA [CONFIDENT-CTA] "Try It Risk-Free." Bridge: restate → validate → reframe with proof → anticipate follow-up → certainty close. Product: product + proof element. Post-Product: [CONFIDENT-CTA] "Try It With No Risk."

IF MISSING
Pull top objections from 1–3 star reviews. Defaults: price, "won't work for me," complexity, safety.

9 · Results Email — P3 · Vehicle

Objection: "The product won't fix it" **Goal:** Show specific results from real users. Showing the work is the most persuasive thing you can do.

HOW TO WRITE IT

1. Lead with the result in the subject — number, timeframe, change.
2. Give context: who, what they dealt with, how long.
3. Use their exact words.
4. If a before/after image exists, use it.
5. CTA: "Get the same result →"

HOOK / SUBJECT ANGLES

"3 weeks. No texture. Here's the photo." · "He used it for 30 days. Here's what happened." · "The review that stopped us in our tracks" · "From 6 products to 1. Here's his before and after."

PREVIEW TEXT ANGLES

"Real photo inside" · "Specific numbers, specific timeframe" · "His exact routine"

SECTION BRIEF Hero: result in headline (number + timeframe) / CTA [CONFIDENT-CTA] "Get The Same Result." Bridge: who → what they dealt with → timeframe/result → their words. Product: exact products used, [PRODUCT-CTA]. Post-Product: [CONFIDENT-CTA] "Try The Same Thing."

IF MISSING
Pull the brand's most specific transformation story. Need: timeframe, outcome, name, products used.

The 4-Week Rotation Calendar

3 emails per week. SMS in Weeks 2 + 4. Cycle resets Week 5 — same structure, new content. Every 4 weeks = 12 emails + 2 SMS = 14 touchpoints with zero repeat angles.

WEEK	MON — P1 BRAND	WED — P2 SELF	THU SMS	FRI — P3 VEHICLE
1	Founder Story	Enemy Email	—	Mechanism Email
2	UGC Dump	Transformation Story	Flash Proof	Results Email
3	Transparency Email	Education Email	—	Objection Killer
4	Founder Story (new	Enemy Email (new	Identity	Mechanism Email (different

angle)	enemy)	Hook	feature)

Week 5 resets the structure. Content is always new. The slots never change.

The SMS System

SMS fires once every 2 weeks — Week 2 and Week 4. High-interruption, so it earns its place by being punchy, direct, never repetitive. SMS is not a mini email — it's a spike of one idea with one action.

CORE RULES

— Never more than 3 lines. If it needs more, it's an email.

— Always one job — one emotion, one CTA, one idea.

— Never fake urgency. Credibility is the long game.

— Fire Thursday in Week 2 to avoid cannibalizing the Friday email.

TYPE	PILLAR	WHEN	HOW IT WORKS
Flash Proof	P3	Week 2	1 raw result + hard CTA to PDP. 2–3 lines max.
Identity Hook	P2	Week 4	One sentence that makes the reader see themselves. Link optional.
Urgency Drop	P3	Swap anytime	Restock, limited batch, sale ending. Never faked.
Cold Truth	P1/P2	Swap anytime	One uncomfortable truth. No product push. Pure authority.
UGC Screenshot	P1	When fresh UGC drops	Raw DM/review screenshot + caption + link.

SMS TEMPLATES

> FLASH PROOF
> [Name] cleared his texture in 3 weeks.
> Same routine. Real photo: [link]
>
> IDENTITY HOOK
> If you've tried 4 different products this year and still don't trust your skin, this is for you: [link]
>
> URGENCY DROP
> The bundle restocks tonight at 8pm.
> Last batch sold out in 6 hours. [link]
>
> COLD TRUTH
> Most skincare brands sell you the 9th step you don't need. The first 3 matter. That's it.
>
> UGC SCREENSHOT
> Just got this from Marcus:
> "Day 30 — first time my skin looks healthy."
> [screenshot attached] [link]

KPI Override Rules

The 4-week rotation is the default. Override when data tells you something is broken — or working. Check KPIs every Monday. Override surgically, not emotionally.

SIGNAL	MEANING	EMAIL OVERRIDE	SMS OVERRIDE
Opens < 20%	Weak subjects / fatigued list	Enemy Email or Education (curiosity hooks)	No change
Opens ✓, Clicks < 1.5%	Body copy not landing	Mechanism + Results back-to-back	Flash Proof
Clicks ✓, Conversions low	Belief gap	Transformation → Objection Killer combo	Identity Hook
Unsubscribes spiking	Too promo, not enough value	2 value emails per 1 CTA email	Skip SMS that cycle
Revenue spike	Something clicked	Double down on that pillar, 2 weeks	Match pillar in next SMS

New UGC drops	Fresh weapon	Slot UGC Dump into next send	Send UGC Screenshot SMS

The Never-Run-Out Engine

Content scarcity is a planning failure, not a creativity failure. Every real-world event maps to a campaign slot. Maintain one live doc (Notion / Sheets) with two columns: Trigger Event → Maps To. Log every review, DM, question, or competitor move immediately. The backlog IS the calendar.

TRIGGER EVENT	MAPS TO
New review / testimonial	UGC Dump / Results Email
Customer shares a transformation	Transformation Story
Competitor does something wrong	Enemy Email (don't name them — frame the contrast)
New ingredient / feature	Mechanism / Education
Industry myth spotted	Objection Killer / Education
Brand hits a milestone	Founder Story (new angle)
Customer DM with a question	Objection Killer — if they asked, 100 others are thinking it
Slow week / no new content	Education Email

> **THE 10 CUSTOMER RULE**
> 10 real customers who've responded in any way = 30 emails queued minimum: 10 transformation stories + 10 results emails + 10 objection angles from their questions. You never run dry.

proper *emails.*

PART 04 / COMPLETE WORKING MATERIAL

Design + *Master Prompt*

The production layer: a five-part visual and verbal system, email construction rules and an AI-independent master prompt.

- Brand profile, tokens, components, voice and output specs
- 600px email canvas, CTA system and deliverability rules
- Portable master prompt and setup checklist for any AI tool

The 5-Layer Framework

Fill this in once per brand. Every layer feeds the next — don't skip the Brand Profile, everything else depends on it.

01 · BRAND PROFILE	ICP (one named person, not a demographic) · Voice (3 adjectives you are, 2 you're not) · The 3 objections (trust / belief / conviction) · Mission line (one sentence)
02 · VISUAL TOKENS	Color palette (primary, secondary, accent, 3 neutrals, 2 semantic) · Typography scale (headline/subhead/body/caption/label — font, size, weight, line-height) · Spacing scale (4px base: 8/16/24/32/48/64) · Radius & borders
03 · COMPONENT LIBRARY	The minimum 8: Header · Headline · Body · Image · Primary CTA · Quote · Divider · Footer — each with its exact tokens and spacing
04 · VOICE RULES	Words you use · Words you ban · Sentence cadence · Punctuation rules · Open/close patterns (with 3 examples each)
05 · OUTPUT SPECS	Subject 30–50 chars, no emoji, no all-caps · Preview 50–90 chars, extends subject · Body length by type (Welcome 1: 150–250w · Founder: 400–600w · Campaign: 200–350w)

> THE RULE
> If a value isn't in your token list, it doesn't exist. No "just this once" overrides — every override becomes tomorrow's inconsistency.

---

1 · The Canvas

— Width: 600px, locked — email standard

— Height: variable, optimize for short scroll

— Mobile-first: assume 70%+ opens on phone

— Background: brand-neutral, never pure white unless the brand IS pure white

---

2 · Universal Section Structure

Every email follows this order top to bottom. Sections may be omitted by type — never reordered.

1. Logo Bar — white/neutral bg, centered logo, ~80px, no top nav links
2. Hero Section — headline (4–10 words) + subhead + primary CTA + offer if applicable, gradient overlay for legibility, ~500px max
3. Bridge Section — 1–3 sentences, pyramid text hierarchy, no essay copy
4. Product Section — 1–4 products (3 is the sweet spot), S-curve/zigzag layout, individual CTA per product
5. Post-Product CTA — one general browsing CTA, catches non-converters
6. Footer — nav links, social, trust elements, live text (mandatory for deliverability)

---

3 · Design Rules

DEPTH OVER FLAT

— Subtle brand-aligned gradients, layering, shadows — avoid plain white across the whole email

VISUAL FLOW

— Eye travels top → bottom · pyramid hierarchy: headline > subhead > body · spacing rhythm 8/16/24/32px

BUTTONS

— Rounded rectangles, 8–12px radius · high contrast · bold text, sentence case OR all caps — pick one · min 44×44px tap target

COLORS & TYPOGRAPHY

— Brand colors only, one neutral background · max 2 font families per email · headlines bold/tight leading · body regular, 1.4–1.6 line height

4 · Copy Rules

TONE

Neutral, confident, structured, conversion-focused. Speaks to the reader as a peer. Brand Voice Profile overrides this baseline.

STRUCTURE

— Sentences under 12 words, mostly · paragraphs 1–3 lines max · active voice always · specifics over vagueness ("3 weeks" not "quickly")

— Banned: synergize, innovative, cutting-edge, leverage, utilize, robust, holistic

HEADLINES

— 4–10 words max · pattern: curiosity hook, direct benefit, or identity callout

SMART CTA SYSTEM

PLACEHOLDER	POSITION	EXAMPLE COPY
[PRIMARY-CTA]	Hero / top of email	"Shop The Drop" / "Claim 20% Off"
[SOFT-CTA]	Mid-body, after proof	"See What They're Saying"
[PRODUCT-CTA]	On each product card	"Shop Now" / "Add to Routine"
[BROWSE-CTA]	Footer / post-product	"Shop All" / "Explore Best Sellers"
[LIGHT-CTA]	End of educational email	"See How We Apply This →"
[CONFIDENT-CTA]	End of objection killer	"Try It Risk-Free →"

Never use: "Click here," "Learn more," "Submit," "Continue."

5 · Deliverability & Export

— 60/40 image-to-text ratio — live text must exist, usually in the footer. No 100% image emails.

— Alt text on every image slice. Compress slices under 1MB total when possible.

— Subject under 50 characters. Preview 80–120 characters, complements the subject, never repeats it.

— Slice each section needing a unique link separately. Each product = its own slice. Footer built native in Klaviyo — never sliced.

— Export JPEG at 2x. Max slice height 1000px at 600px width.

— Klaviyo: Image Blocks for sliced sections, Button Blocks for CTAs (the "sandwich technique" — image slice + native button underneath, zero padding between). Footer and Header = Saved Components, built once, reused.

6 · Banned Practices

— Top navigation bar · 100% image emails · More than 4 products in one email

— Flat white background across the entire email · Generic CTAs ("Click here," "Learn more")

— Paragraphs over 3 lines · Multiple discount codes in one email · Footer without trust elements

— Email width other than 600px · More than 2 font families · Colors outside the brand Design System

7 · One-Shot Generation Rule

The AI generates a complete, ship-ready email on the first prompt — no Q&A round before generating. The operator provides all context upfront in the prompt + blueprint. The AI fills gaps with smart defaults from the brand's Design System and email-type conventions, and lists an "Assumptions Made" section (1–4 bullets) at the end so the operator can swap during tweaks. Iteration happens after generation, not before — re-prompt for a full new version only if the first output fundamentally missed the brief.

The Master Prompt

Paste this master prompt into your preferred AI's workspace or a fresh chat. Give it the Brand Profile, Visual Tokens, Component Library, Voice Rules and Output Specs as context. If uploads are unavailable, paste the relevant instructions before running the prompt.

```
## ROLE
You are the in-house email lead for [BRAND NAME]. You write and structure
emails that strictly inherit from the Brand Profile, Visual Tokens,
Component Library, Voice Rules, and Output Specs in this Project.

## TASK
Write one email with the following parameters:
- Email type: [welcome / founder story / education / transparency / cart abandon /
  browse / post-purchase / winback / campaign]
- Flow position: [e.g. Welcome 02 of 06]
- Customer state: [cold / warm / cart / post-purchase / lapsed]
- Primary objection to address: [trust / belief / conviction]
- Specific angle: [one sentence describing the email's argument]
- Word count target: [pull from Output Specs based on email type]

## CONSTRAINTS
- Use ONLY tokens defined in tokens.md. No new colors, fonts, or spacing.
- Use ONLY components defined in components.md. No new block types.
- Follow voice.md exactly. Words you use. Words you ban.
- Respect every rule in Output Specs (subject length, preview length,
  body length, CTA rule, image ratio).
- One primary CTA. Repeat it if needed. Never add a second goal.

## DELIVERABLES
1. Subject line (30-50 chars)
2. Preview text (50-90 chars, extends subject, doesn't repeat it)
3. Email body, structured as a stack of named components
   from the Component Library. Format like this:
   [HEADER BLOCK]
   [HEADLINE BLOCK] "headline copy here"
   [BODY BLOCK] paragraph one...
   [PRIMARY CTA] "button copy"
   [FOOTER BLOCK]
4. Design notes — any token or component decisions
   that need confirmation (e.g. "uses --color-accent for headline").

# Do not invent. Do not improvise outside the system.
# If a requirement conflicts with the system, flag it and stop.
```

Build Sequence — Setup, Once Per Brand

1. Open a workspace or new chat in your preferred AI.
2. Add the Brand Profile: ICP, voice, mission and three objections.
3. Attach tokens.md (or paste its colors, type and spacing rules).
4. Attach components.md (or paste the eight component definitions).
5. Attach voice.md (or paste vocabulary and cadence rules).
6. Provide Output Specs and the required email platform constraints.
7. Run the Master Prompt. Check the output against all source rules.
   Improve the system files when you find repeated drift.

09 / WHAT THE SYSTEM GIVES YOU

The honest version.

A playbook is not an installed retention program. It gives you a structure to work from; a functioning system still requires setup, testing and iteration.

YOU NOW HAVE	YOU STILL NEED
01 **Flow and campaign blueprints**	01 **Set up flows, segments and suppression**
02 **Five-layer design system**	02 **Test triggers, rendering and deliverability**
03 **AI-agnostic production workflow**	03 **Review KPIs and refine weekly**
04 **Sample cadence and review rules**	04 **Maintain content, consent and quality**

Work from the framework yourself or use a retention partner to implement and manage it. Neither replaces learning from the data your customers actually generate.

10 / IF YOU WANT A PARTNER

You build the brand. We build the inbox.

Proper Emails works with DTC e-commerce brands on retention strategy, automated flows, campaigns, creative and ongoing optimization.

FLEXIBLE WAYS TO WORK TOGETHER

01	**Flows and infrastructure**
02	**Campaign copy and design**
03	**Segmentation and reporting**
04	**Project work or ongoing retention support**

Want help making this real? Tell us about your store, where retention is leaking and what you want to improve. We can discuss the scope that actually fits your business.

EXPLORE PROPER EMAILS ↗

proper *emails.*

RETENTION IS THE RELATIONSHIP.

Acquisition gets them through the door.

Retention keeps them.

A useful system. An unmistakable brand. A better inbox.

proper *emails.*

ONE-PAGE IMPLEMENTATION CHECKLIST

From playbook *to live system.*

01 AUDIT
Identify existing flows, segments, baseline metrics and consent status.

02 BRAND SYSTEM
Document ICP, objections, tokens, components, voice and output specs.

03 AUTOMATIONS
Build the eight behavior-based flows; configure exits and suppressions.

04 CAMPAIGNS
Create the three-pillar rotation; prepare four weeks of distinct angles.

05 SMS
Implement only with channel-specific consent, opt-out and local compliance.

06 QUALITY CONTROL
Test links, mobile rendering, event triggers, segments and claims.

07 ITERATE
Review revenue attribution, clicks, unsubscribes and customer response.

Your AI can draft. Your team still owns accuracy, consent and quality.
